Or the Origin of Man In this volume I present to the public substantially what I have been presenting in my lectures for more than twenty-five years, giving here, however, greater prominence to the spiritual origin of man; for the question of man s natural origin is generally decided in the affirmative, and the great question now is as to the means by which the result was naturally produced. The writings of Lyell taught me in youth that the present condition of our planet is the result, not of miraculous achievement a few thousand years ago, but of the operation of natural causes during many millions of years. The Vestiges of Creation first led me to believe in man s natural origin; and my own investigations in mesmerism, spiritualism, and psychometry, showed me the defectiveness of the theories advanced by Darwin, Huxley, and others of the natural selection school.
